Dear Sir:

For a long time I have been studying the coinage of Metapontum, and I am writing to ask whether you can send me casts of the pieces in the Collection in your charge. Dr. Regling at Berlin has offered to send me casts of those there at a cost of one mark each. If you could send me casts of the pieces in the Münich Collection, I should be very glad to have you do so at once, and on receipt of your reply as to the number of pieces, I would send you a remittance to cover.

If this suggested arrangement is satisfactory to you, might I ask that you send first the double relief staters, then the incuse pieces, to be followed lastly by the fractional silver and the bronze pieces.

I trust that my request will not lay an undue burden upon you, and awaiting your response I beg to remain

Yours truly,

Secretary

Sehr geehrter Herr!

Die Abdrücke in Siegellack stehen Ihnen gegen Ersatz der
Auslagen, nämlich 1 Mark pro Münze zur Verfügung. Wir besitzen

Jncusi - 21 Stück

Doppelseitige 59 "

Bronce - 36 "

Es wird sich empfehlen, sämtliche Stücke zusammen abzudrücken
und die Abdrücke in einer Sendung an Ihre Adresse abgehen zu
lassen.

Hochachtungsvollst

Dear Sir:

Please accept my thanks for your letter
of November 3rd.

I take pleasure in enclosing a draft for
130 marks, and I shall greatly appreciate it if you
will have prepared for me casts of all the Metapontine
pieces in your collection. The amount is
slightly increased to cover the cost of postage.

Very truly yours,

Secretary

Dear Sir:

I beg to acknowledge receipt of the wax impressions of the Metapontine staters in the Munich Collection. Please accept my thanks. I am enclosing a cast of one of them. Might I trouble you to send me the weight of it and to inform me whether, in your opinion, there are any indications of the piece being plated? Until now, I have known but one other specimen, in the Amsterdam Cabinet, and this one is plated.

Thanking you for your courtesy, I am

Dear Sir:

Permit me to thank you for your word
regarding the Metapontine stater which you tell
me is 'subaeratus'. This would have proved a
rather troublesome piece had this condition not
been the fact.

Very truly yours,

Dear Sir:

One of the members of the American Numismatic Society is preparing an article on the rare gold coins issued about 400 B.C. by several cities of the Thracian coast (cf. Gardner, Ancient Coinage, p. 292 and Head, Hist. Num. xliii). Will you be so good as to inform me whether there are any of these rare issues in the cabinet under your charge? We are particularly anxious to locate the heavy weight specimen of Maroneia, illustrated by Head, p. 250, but after careful search we have been unable to find any trace.

Will you at the same time inform me of the number of Maronetan staters there are in your collection and of the cost of having casts of these prepared. We should not desire the large flan late issues of the second century and later.

Very truly yours

Dear Dr. Habich:

On page 2250 of his Historia Nummorum, Dr. Head describes two gold coins of Maroneia. The heavier of these two, we have been trying to trace but in vain. I am wondering if it can be part of the cabinet under your charge, and if not whether you know of its present whereabouts.

Will you also kindly advise me of the number of tetradrachms of Maroneia in your collection struck prior to 350 B.C?

I should also appreciate an estimate of the cost of having casts of these prepared in case we should decide to request them.

Thanking you for your courtesy, I am

Dear Dr. Habich:

Thank you for yours of July 24th, and for the prompt sending of the casts which reached us in good condition. I am enclosing One Dollar (\$1.00) to cover the cost.

Regarding your Preparator's (Mr. George Kilian) note saying that he could furnish the casts of Marcisia pieces in the Naville Sales, does that mean that you have casts of all the pieces that have occurred in these Sales? Because it may be very important should we desire casts in future, to know that they may be obtained from Mr. Kilian.

And do you also have casts of the earlier Hirsch Sales? I am particularly desirous of securing a copy of No. 621 in the Hirsch XXXIII, 1913, Sale. If this can be supplied, there might be sent with it Naville I, Nos. 1042, 1043 and 1049, and Naville VI, No. 622; but these last are not of sufficient importance to be sent alone.

Also, if you have in your Cabinet any of the tetrobols similar to the Hirsch XXXIII, No. 621 piece, or any of the Mende tetrobols with the reverse inscription reading MENDIEM, I would appreciate it if you would include casts of these also, and have a memorandum to cover their cost sent me.

Very sincerely yours,

Dear Mr. Habich:

One of the members of our Society is undertaking an arrangement of decadrachms of Syracuse of the Euainetos type (not those of Kimon). Will you be so kind as to have casts of those in the possession of your Cabinet prepared and sent to me at your convenience, together with a memorandum to cover the cost of having this done. It is our purpose to illustrate most and possibly all of these decadrachms. It is consequently necessary to have the casts.

Thanking you for past courtesies, I beg to subscribe myself

Very respectfully yours,

Dear Dr. Habich:

Your letter to Mr. Gallatin suggesting that you would be glad to have a set of our Numismatic Notes and Monographs has been referred to me. May I ask whether your Library possesses any of these issues or whether you lack the entire set. Certain of them are now out of print. We appreciate your offer to exchange in kind. I am wondering whether the practice of publishing the accessions as 'Sonderabdruck aus dem münchener jahrbuch der bildenden kunst' has been continued. If so, we have only excerpts from the 1909, 1910, 1911, and 1913 issues of the periodical. If any additional numbers are available for exchange we should appreciate having them. I am enclosing a list of our Numismatic Notes and Monographs for your information.

Very cordially yours,

Secretary
